

RHS Students Repair Broken Printing Press

By CATHY CURTIS

Towards the close of last month, the REGENTS REVIEW staff was anxiously awaiting arrival of the Christmas issue when the press broke down, bringing everything to a screeching halt. According to Mr. Michael Enjaian, print advisor, this unfortunate happening occurred because a much-needed screw came loose and made a straight path toward two cylinders and the press blanket.

With metal shop directly across the hall, the appalling news reached the ears of two metal workers first. Though already engaged in work, Bill Gregory, B-12, and Larry Schoeflin, also a B-12, immediately dropped their minor tasks and rushed to the print shop, where they were met by Larry Engels, B-12, and Buddy Burns, another B-12, who were already at work.

The four young men repaired the two cylinders, also finding the thoroughly crushed, much-needed screw. Due to the efforts of these mechanical wizards, the famous Reseda High School paper met its deadline.

THE PRESS WILL ROLL: B-12's Bill Gregory, Larry Schoeflin, Buddy Burns and Larry Engels, repair press for Christmas issue of REGENT REVIEW.
